About Bioelements

We are skin care scientists – creating personalized, clinical formulas for use in the spa, and at home.

**Part Science. Part Nature. Entirely Clean.**

We’ve been consciously clean, mindful skin scientists since 1991.

**Efficacy-Forward**

Our skin-beneficial ingredients are innovated in the lab, or come straight from nature.

**We Love to Say “No”**

Our formulas are free of sulfates, phthalates, mineral oil, petrolatum, parabens, fragrance and dyes.

**Responsible Testing**

Each product is clinically tested for safety + efficacy, dermatologist tested, and never tested on animals.

**Bioelements Product Integrity**

- No artificial colorants
- No synthetic fragrance or perfume
- No parabens, DEA or phthalates
- No harsh irritants
- Not tested on animals
- Dermatologist, ophthalmologist, and clinically tested for safety + efficacy
- Scientifically tested results based on consumer perception studies
- Real-world efficacy testing by top estheticians

**Products used by estheticians in the spa**

In addition to our at-home skin care, we create professional-use formulas designed solely for trained professionals in the treatment room. Why do estheticians love, trust and rely on us? Because we put the control right in their hands.

**Custom Blending**

We don’t believe in off-the-shelf, one-size-fits all skin care. A Bioelements facial is personalized just for the client – their environment, age, and stress level. A few drops of our Custom Blend formulas can target exactly what the skin needs right now: maybe it’s redness, or dehydration, or a few new lines. It’s not too good to be true, it’s just skin care that’s so personalized, it might as well have your name on it.
